GeoNetwork
opensource

- Catalogus voor het registreren van ruimtelijke bronnen (datasets, services, kaarten, documenten)
- Opgericht in 2004 bij de de FAO
- Wereldwijd in gebruik op allerlei niveau's

The screenshot displays the GeoNetwork website interface. At the top, the logo features a stylized globe icon next to the text "GeoNetwork" with "opensource" in smaller green text below it. Navigation links for "News", "Documentation", and "Download" are on the right. The main content area includes a "Home" link, a brief description of GeoNetwork as a catalog application for managing spatially referenced resources, and a "Features" section. The "Find & get information" section highlights the web interface for searching geospatial data across multiple catalogs, mentioning full-text search and faceted search capabilities. A screenshot of the search interface shows various filters like "TYPE OF RESOURCES", "YEARS", "SPATIAL TYPES", "SERVICE TYPES", and "SCALE DENOMINATION". The "Make your maps" section is partially visible at the bottom, mentioning an interactive map viewer.

GeoNetwork is a catalog application to **manage spatially referenced resources**. It provides powerful **metadata editing** and **search** functions as well as an interactive web map viewer. It is currently used in numerous **Spatial Data Infrastructure** initiatives across the world.

Features

Find & get information

GeoNetwork provides an easy to use web interface to search geospatial data across multiple catalogs. The search provides full-text search as well as faceted search on keywords, resource types, organizations, scale, ... Users can easily refine the search and quickly gets to the records of interests.

GeoSpatial layers, but also services, maps or even non geographic datasets can be described in the catalog. Easily navigate across records and find sources or services publishing a dataset.

Welkom op de iso19139.nl.geografie.1.3.1 wiki!

Since this profile is only used in the Netherlands, and most users are more familiar in Dutch, this documentation is in Dutch only.

Op de gebruikersgroep ontmoeting september 2016 bij gemeente Rotterdam is voorgesteld om naast de gebruikersgroep pagina (<https://osgeo.nl/geonetwork-gebruikersgroep/>) ook deze github repository te gebruiken om ervaringen met het gebruik van de Nederlandse profielen te delen. Op de wiki vind je informatie over hoe de profielen te installeren en tips over het gebruik van GeoNetwork in een Nederlandse context in het algemeen.

Je kunt issues aanmaken (en meepraten over) op het issues gedeelte. Ook pull request worden bijzonder gewaardeerd :-)

Bekijk hoe je op eenvoudige wijze mee kunt helpen in de ontwikkeling door mee te vertalen middels het [Geonetwork transifex project](#)

GEBRUIKERSGROEP

<https://osgeo.nl/geonetwork-gebruikersgroep/>

The screenshot shows the OSGeo.nl website with a green header. The main navigation bar includes links for Thuis, Over ons, Meedoen, Agenda, Nieuws, Community, and Sponsors. A search bar is located on the right. The page title is 'GeoNetwork GebruikersGroep'. The main content area contains a paragraph about the GeoNetwork Open Source Software product and its use within the Dutch government. It mentions that the GeoNetwork GebruikersGroep aims to stimulate the exchange of knowledge about the use of GeoNetwork. To the right of the text is a large logo for 'GeoNetwork OpenSource' and a smaller 'OSGeo Project' logo. At the bottom, there is a call to action for organizations to join the group by contacting Cora van Oorschot.

GeoNetwork GebruikersGroep

GeoNetwork GebruikersGroep

Het Open Source Software product GeoNetwork wordt op vele plekken gebruikt binnen de Nederlandse Overheid. Binnen de GeoNetwork GebruikersGroep willen we het uitwisseling van kennis over het gebruik van GeoNetwork stimuleren. Daardoor kunnen we van elkaar kunnen leren en meer en beter samen optrekken in de ontwikkelingen om mogelijk hergebruik te stimuleren.

Alle organisaties die met GeoNetwork (willen gaan) werken zijn van harte uitgenodigd om aan te schuiven. Heb je belangstelling, meld je dan aan bij [Cora van Oorschot](#).
